Notes to Presenters

- These slides are from a presentation by Dr. Frank Summers of the Space Telescope Science Institute in February 2015.
- This presentation features one Hubble image from each year of operation. This set is not meant to represent the most significant, most beautiful, or most anything. They are ones that illustrate the breadth and depth of Hubble observations, as well as the stories the speaker wanted to tell. Please adjust or augment as you see fit.

Notes to Presenters 2

- Images are predominantly public domain NASA images or unrestricted images from wikimedia commons. However, strict copyright checking has not been done.
- See further notes on each slide. Slide notes, written by Dr. Summers, explain the basic ideas of each slide's graphics.
- A longer, and slightly different, version of this talk is available to watch on YouTube:
 - https://www.youtube.com/watch?v=8vpHrCtdDtA
